## Make the Switch! Paper Feed Sheets to the TAP FEED App

Use your nutritionist's most current ration recommendations and eliminate looking for those paper feed sheets. Use your mixer scale to manage more than just ingredient weights, precision feed management tools from Topcon will help you reduce shrink and improve ration consistency. The TAP Feed app offers easy-to-use functionality for feed management: loads, recipes, feeding groups, and exportable report. It is compatible with the [Topcon/Digi-Star Bluetooth 2810](#) display. The [TAP FEED App](#) is now compatible with nearly any mobile device, available for free on both Android and iOS operating systems through the Google Play and Apple App Store.

\*TAP FEED operates as a stand-alone system. Users have the option to login as a "Guest" for a test run before creating a FEED Account Registration.

The EZ 2810 BT integrator has standard integrated Bluetooth functionality. It is designed with a bright high-contrast display and large 1.7" (43 mm) white backlit screen. There is a preset weight function to provide improved accuracy and management of loading & unloading. It comes with an internal "alarm light & horn" to alert operator of approaching target preset weights. The Rotation Counter/Timer significantly aids in controlling mix time & processing.
