

DeltAg MicroVite

For many years, dealers and growers have been utilizing a combination of products from **DeltAg** in a tank mix on everything from in-furrow on corn to foliar combos on seedling corn in cold weather to vegetable crops and even commercial greenhouse operations. With the many comments about having to tank mix several different products, **DeltAg** developed **MicroVite**. After five years of development and testing, this new formula is available to you and your growers in 2008.

The following tank mix had become standard for many operations where several nutrients are desired:

Zinc Plus @ 16 Oz/acre

Copper Plus @ 8 Oz/acre

Manganese Plus @ 8 Oz/acre

Magnesium Plus @ 16 Oz/acre

Sulfur Plus @ 16 Oz/acre ** Sometimes added

DeltAg MicroVite is a formula analysis that is 4% zinc from **Zinc Plus**

1% copper from **Copper Plus**

1% manganese from **Manganese Plus**

2% magnesium from **Magnesium Plus**

5.7% sulfate sulfur from the above ingredients

NOTE: MicroVite is not a blend of existing products from **DeltAg**, but must be formulated from scratch. To get the same equivalent, the grower must buy four different products, tank mix them together, and the final per acre rate would be 48 ounces.

RESEARCH: Three years of field work in replicated trials has convinced us that, not only is **MicroVite** as good as the combination, but out-performs the tank mix combination in the field.

MicroVite at 32 ounces per acre is equivalent to the above mentioned standard combo rates of:

16 Oz **Zinc Plus**

8 Oz **Copper Plus**

8 Oz **Manganese Plus**

16 Oz **Magnesium Plus**

and 22 Oz **Sulfur Plus**

IMPORTANT: It is not economical for the grower to substitute **MicroVite** for 32 ounces per acre of **Zinc Plus** in a soil application with high zinc demand crops like corn, rice or pecans. Remember, **MicroVite** at 32 ounces is equivalent to 16 ounces of **Zinc Plus**.

We are very excited about the prospects for this new formula and would encourage our dealers to consider carrying and recommending **MicroVite** anytime a grower needs a combination of any of these five nutrients.
