

Give your row crops the N-TEXX advantage.

BENEFICIAL MICROBES FOR ROW CROPS

Microbes Make All the Difference: Better Quality and Higher Yields.

Put your soil biology to work. Microbes interact to perform the functions needed by plants in the soil. They reduce nutrient leaching, improve nutrient retention, facilitate nutrient cycling, and enhance soil structure. The efficiency by which plants acquire nutrients from the soil is a major determinant of crop yield and quality. Microbes are the building blocks for organic matter in soil which improves water holding capacity. Building up soil biology also enhances plant vigor as a protective layer against pests and diseases. As microbes compete against pathogens, they can also produce compounds antagonistic to other unfavorable soil microbes.

N-TEXX[®] Soil Inoculant with Humus

N-TEXX[®] Soil Inoculant (SI) with Humus is an all-natural liquid soil inoculant formulated to enhance soil structure, root development, nutrient uptake, and water infiltration. This product enhances fertilizer program by increasing plant nutrient uptake while reducing crusting of topsoil and increasing root mass growth.

Applications:

N-TEXX[®] SI with Humus's unique concentrated liquid formulation allows for ease of application. It may be tank mixed with fertilizers and herbicides, allowing for flexibility on the farm.

Rates:

Seed Treatment: 4-8 oz. per 100 lbs. of seed
Planting: 1-2 qt. per acre preferably with starter
(on top of seed, 2x2, or in furrow)
Side Dress: 1-2 qt. per acre preferably with side dress fertilizer
Broadcast: 1-2 qt. per acre preferably with fertilizer
Fertigation: 1-2 qt. per acre preferably with fertilizer

Available Sizes:

275-gallon tote | 30-gallon drum
5-gallon case | 4-gallon case

Call your trusted partner today!

For over fifty years, CXI has been a trusted name and respected leader in the development of microbial products and applied solutions for our agricultural partners across the world.

We understand the unique and evolving business needs of today's grower, the competitive and challenging climate in which growers operate, and how to maximize returns on every dollar invested.

With leading products such as N-TEXX[®] Edge, N-TEXX[®] 15-5-5, N-TEXX[®] Soil Inoculant 7-0-0, and WASTE AWAY[®], CXI offers proven, cost-effective solutions for every grower and every crop.
