

Zn EDTA

FERTIGATION

FOLIAR

INJECTION

PRODUCT DESCRIPTION

ProAcqua® Zn EDTA nutrients are a dry microgranulated EDTA with a proprietary adjuvant package formulation that can be used on all crops grown in field or controlled environments, and is designed to be a part of a balanced fertility program.

Guaranteed Analysis

Zinc (Zn) 100% Water Soluble	15.00%
---------------------------------	--------

Derived from Zinc EDTA

Product Specifications

Appearance	Color	Solubility (%)	pH 10% Solution
Microgranule	White	100	6.6

KEY BENEFITS

- Essential for protein synthesis
- Provides greater integrity to cell walls
- Aids in grain development through improved pollination
- Improves root growth and root hair development
- 100% soluble
- Uniform coverage
- Fast leaf penetration
- Highly compatible with phosphate-based fertilizers, herbicides and most crop protectants
- Provides flexibility in storage, transport and blending
- Private label and multiple packaging options available
- Dust-free
