

TDC Dagger

Consistent Residue and Material Chop – Leads to more uniform seed placement by reducing row chatter. Seed placement is critical, especially in high-speed planting. Topcon brings legacy tillage implements up to and exceeds newer OEM tillage performance. For implements **under 30'**, the **2-sensor** ultrasonic Dagger kit provides automatic vertical up/down control.

Kit includes:

-
- | | |
|--------------------------|-------------------------|
| • Two Ultrasonic Sensors | • Hydraulic Valve Block |
| • Cabling | • ISOBUS Connector |
| • Mounting Hardware | • TDC Module |
